

Playing unlike any other action title on the market with its physics-based reactive environment, *Happy Tree Friends False Alarm* is an action-puzzle game that enables players to control one of three characters; Flippy, the emotionally tattered war-torn bear; Lumpy, the dim-witted blue moose; and Handy, an amputee beaver carpenter always eager to lend a helping limb. Using resources such as concrete, ice, gasoline, and nitroglycerin to augment the dynamic 3D environments, your goal is to save the *Happy Tree Friends* from hilarious disaster situations and their own bad luck. Play in 10 diverse levels designed exclusively for the *Happy Tree Friends False Alarm* game including mine shafts, candy factories and a museum, all of which are filled with outrageous outcomes and plenty of accidental mayhem!

“Sega is a perfect partner for us because of their rich tradition of creating compelling, character-based games, and true to form they’re developing a truly original game that we think our fans will love,” said Kenn Navarro, the creator of *Happy Tree Friends*.
